

Autosomal Transfers

If you or a family member have previously tested your autosomal DNA at 23andMe®, AncestryDNA™, or MyHeritage™, you can transfer your results to FamilyTreeDNA by uploading your raw data file. After transferring your file, your autosomal data is uploaded to our database, one of the world's largest genetic genealogy databases.

When you transfer, for free, you will receive a list of your autosomal matches from our database and have access to our Family Finder – Matrix. The Matrix feature allows you to select and compare the autosomal DNA relationship between up to ten of your matches at one time.

Note: [Family Finder](#) is the name of our autosomal DNA test.

After transferring, you can unlock all Family Finder features, which include the Chromosome Browser, myOrigins, and ancientOrigins for only \$19.

Please note that you can only transfer the following files and file versions:

- 23andMe® V3
- 23andMe® V4
- 23andMe® V5
- AncestryDNA™ V1
- AncestryDNA™ V2
- MyHeritage™ files that were created within the six months prior to the time of the transfer.

Unfortunately, at this time, you cannot transfer 23andMe® V1 and 23andMe® V2 files.

How to Transfer Your Autosomal DNA Results

New Customers

Current Customers

The following describes how to transfer 23andMe® or AncestryDNA™ autosomal DNA results, for those who already have a FamilyTreeDNA kit.

Important: If the person whose results are being transferred **does not** already have a FamilyTreeDNA kit, please see the *New Customers* topic.

1. [Sign in to your myFTDNA account.](#)

2. In the upper-right corner of the page, on the navigation bar, click **ADD ONS & UPGRADES**. You are directed to the *Upgrades* page.

3. On the *Upgrades* page, scroll down until you see the *Autosomal Transfers* section, and click the **Try it Free** button.

You are directed to the autosomal DNA transfer page.

Hi Mary,
Upload raw data and get your results!

Upload your data file from 23andMe / AncestryDNA

How do I access my raw data files ?

Drag and drop here to upload file or **browse file**

SUBMIT

Click image for a closer look.

5. On the upload page, click **browse file** to browse to the autosomal DNA results file you want to upload, or drag and drop the file on the boxed area. The file will start uploading. Note that this could take several minutes.

Once uploaded, the name of the file you uploaded will be displayed in the boxed area.

Hi Mary,
Upload raw data and get your results!

Upload your data file from 23andMe / AncestryDNA

How do I access my raw data files ?

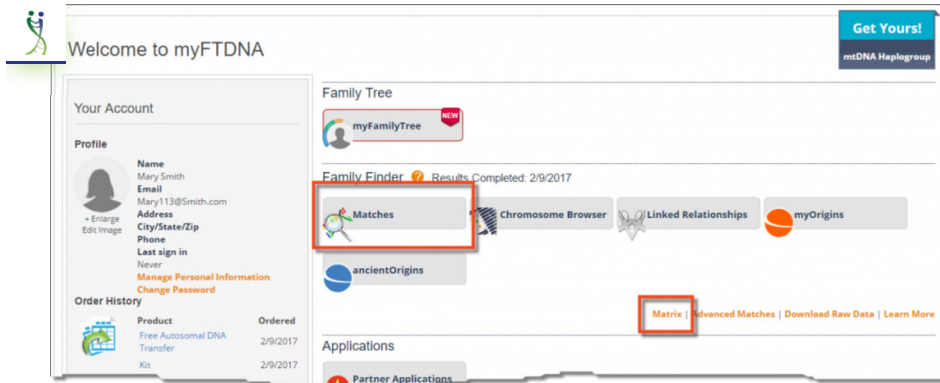

genome_Smith_Mary_Full_20110817071913.txt **remove**

SUBMIT

Click image for a closer look.

6. Click **Submit** to submit the uploaded file. Note that if you uploaded the wrong file, you can click **remove** in the gray box to remove the file and upload the correct one.

7. Once submitted, click **Go to MyFTDNA** to go to your kit's dashboard.

Click image for a closer look.

On your dashboard, in the *Family Finder* section, you can click **Matches** to see your matches or click **Matrix** to compare the relationship between your matches.

Note that if you have not signed the Release Form first, you will be directed to the *Release Form* page. You will need to sign the Release Form before you can proceed to review your matches or access the Matrix.
